

Introduction STATA

Folders

You will use STATA during class time, homework and class project, so it is essential to keep your files organized. Ideally, you will create a folder (e.g. Econometrics) for this class that contains several sub-folders:

Econometrics

- Data (where you keep all data for this class)
- Homework
 - Homework 1
 - Homework 2
 - Homework 3
- Class Exercises (you can save your work based on date or create sub-folders)
- Project
 - Paper
 - Data

File Path

How to find a file path:

- MAC: [Link](#)
- Window [Link](#)

DO file

This set of notes describes how to create a “do” file within the computer program Stata. ”Do” files are very useful for saving your work. [Link](#)

LOG file

This set of notes describes how to create a log file within the computer program STATA. [Link](#)
